

Dell Chassis Management Controller

Remote management adapter - plug-in module - for PowerEdge M1000E

Group	Memory Modules
Manufacturer	Dell
Manufacturer item no.	403-10290
EAN/UPC	5397063767076

Description

The Dell Chassis Management Controller (CMC) is a hot-pluggable systems management hardware and software solution designed to provide remote management capabilities and power control functions for Dell select chassis systems. The CMC can be configured to send e-mail alerts or SNMP trap alerts for warnings or errors related to temperatures, hardware mis-configurations, power outages, and fan speeds.

Main features

Product Description	Dell Chassis Management Controller - remote management adapter
Device Type	Remote management adapter
Form Factor	Plug-in module
Designed For	PowerEdge M1000E

Extended details

	General
Device Type	Remote management adapter
	Networking
Form Factor	Plug-in module
Connectivity Technology	Wired
Remote Management Protocol	SNMP
Features	E-mail alert
	Compatibility Information
Designed For	Dell PowerEdge M1000E
