Description

Today, email is the most widely used vehicle for distributing business data. Yet this communication poses a considerable risk for organizations of all sizes, as both small- to medium-sized businesses (SMBs) and enterprises must protect their intellectual property and sensitive information from inappropriate distribution while also ensuring compliance with laws governing the protection of confidential information.
SonicWall Email Compliance and Encryption subscription services work with the SonicWall Email Security solution to provide organizations of all sizes with a powerful framework for stopping email threats, managing compliance requirements, and providing mobile-ready secure email exchange.
SonicWall Email Security is available as an appliance, a virtual appliance or Windows Server software. The solution combines an award-winning, anti-spam engine with antiphishing, anti-virus, content filtering and policy management.
Adding Email Compliance and Encryption subscription services to the Email Security solution enables organizations to meet both regulatory and corporate requirements. The joint solution enables organizations to identify email for compliance policy enforcement; apply multiple email governance policies; monitor and report on email traffic; and ensure the secure exchange of sensitive and confidential information.
