

# Citrix Virtual Apps and Desktops Advanced Edition

Licence - 1 user/device - hosted - Easy Licence - Linux - Win - Mac

Group	Software
Manufacturer	Citrix
Manufacturer item no.	3013057-EZ

## Description

Citrix Virtual Apps and Desktops provides benefits beyond standard VDI appliance solutions, delivering fully-functioning virtual Windows or Linux desktops and the apps employees need to remain productive. A virtual desktop delivered by Citrix Virtual Apps and Desktops looks and feels the same as a locally installed desktop - even with demanding applications, such as 3D CAD engineering or design apps.

Citrix high definition experience (HDX) technology on Citrix Virtual Apps and Desktops is designed to provide users with the best possible experience, whether on local networks, mobile networks, or high-latency wide-area networks. Not only does the session stay interactive even thousands of miles away from the data center, the technology delivers performance improvements up to ten times faster for file transfers and printing. Compared to legacy technologies, the HDX standard delivers a better user experience with rich media content while reducing bandwidth consumption and maintaining high server scalability.
