

# Matrox Extio Single Mode Upgrade Kit

KVM extender - up to 1 km

Group	KVM Switches
Manufacturer	Matrox
Manufacturer item no.	XT02-2SMTXF
EAN/UPC	0790750240657

## Description

The Matrox Extio series point-to-point, KVM extension solution uses fiber-optic cable to separate the keyboard, mouse, audio peripherals and up to 8 displays from the rest of the computer by up to 1 km (3280 feet). Immune to electromagnetic interference, the fiber-optical connection allows raw, uncompressed data to travel between the remote host system and the user-side Extio appliance, resulting in unmatched HD resolution support and uncompromised workstation performance across multiple displays. Matrox Extio Series is designed for industries requiring stable, reliable graphics and I/O extension technology and is ideal for process control rooms, dispatch centers, and other mission-critical environments. The Single Mode Upgrade Kit consists of two transceivers that upgrades the host PCIe interface card and Extio F2208 / F2408 unit to support extension distances above 400 m (1312') and up to 1 km (3280').

## Main features

Product Description	Matrox Extio Single Mode Upgrade Kit - KVM extender
Device Type	KVM extender
Max Transfer Distance	1 km

## Extended details

	<b>General</b>
Device Type	KVM extender
	<b>Networking</b>
Connectivity Technology	Wired
Max Transfer Distance	1 km
