DIGITUS Professional - Cable management touch fastener strap

25 m

Group	Rack Accessories
Manufacturer	DIGITUS
Manufacturer item no.	DN-CT-5M-25
EAN/UPC	4016032449034

Description

Innovative and fast, optimal cable routing in the network cabinet. The DIGITUS Professional Hook-and-Loop cable management system is used for fast and optimal cable routing in the network cabinet. The system consists of the following components, a self-adhesive mushroom tape, which adheres to all non-powder coated surfaces in the cabinet - please degrease the non-powder coated surfaces before use. Furthermore, the delivery includes a Hook-and-Loop tape, which is ideal for bundling the cable strands in the cabinet. The cable management system is ideal for bundling all common fiber optic and copper data cables. The bundling of 2 - 48 data lines is easily possible. Another advantage is the material protection, the fabric surface offers less material stress of the bundled data lines compared to aluminum and steel ironing cable managers. In addition, the mushroom tape is equipped with ultra-adhesive fastener, which adheres to the contact point with 4 kg per cm².

Main features

Product Description	DIGITUS Professional cable management touch fastener strap
Product Type	Cable management touch fastener strap
Dimensions (WxDxH)	2.5 cm
Length	25 m
Product Material	Polyamide

Extended details

	General
Product Type	Cable management touch fastener strap
Product Material	Polyamide
Width	2.5 cm
Length	25 m
	Environmental Parameters
Min Operating Temperature	-40 °C
Max Operating Temperature	100 °C
