Microsoft Windows MultiPoint Server Premium

Licence & software assurance - 1 licence - academic - Open Value Subscription - additional product - 1 Year Acquired Year 2 - Single Language

Group	Operating Systems
Manufacturer	Microsoft
Manufacturer item no.	V7J-01093

Description

The RDP-compatible network clients, including legacy PCs, conventional thin clients, laptops, and netbooks can be repurposed into MultiPoint stations, and connect to the MultiPoint Server over your network. Thin clients with support for RemoteFX technologies enjoy the richest remote multimedia experience.

Great for labs and libraries where there are a large number of stations needing multiple MultiPoint Server host computers, MultiPoint Server can now discover and manage these multiple computers from a single MultiPoint Manager User Interface.

Integrate Windows MultiPoint Server with your existing Active Directory infrastructure through Domain Join. By joining your Windows MultiPoint Server to your Active Directory Domain, you can leverage your existing user names, passwords and groups on your MultiPoint Server as well as apply Active Directory enabled features such as group policy and roaming profiles to your Windows MultiPoint Server.
