

VMware AirWatch Advanced Remote Management Add On

Licence - 1 device - hosted - prepaid - SPP - for add on of Shared or Managed Hosting Environments only

Group	Software
Manufacturer	VMware
Manufacturer item no.	WPH-LARMD-1TCT0-C1S

Description

Advanced Remote Management (ARM) allows you to connect to end-user devices remotely to aid in troubleshooting and maintenance. ARM is a premium upgrade that uses a remote management client with enhanced functionality. The Remote Management client also has additional support tools and device information available. The combination of remote control and information allows you to troubleshoot any issues on devices quickly and accurately.
