

AC1300 High Gain Wireless Dual Band USB Adapter

Boost Wireless Range

Highlights

AC1300 Dual Band Wi-Fi

Boosted Throughput with MU-MIMO

The Archer T3U Plus receives Wi-Fi signals on two separate bands for all your online needs. Choose the 2.4 GHz band for up to 400 Mbps of surfing, emailing and social media, or switch to 5 GHz for up to 867 Mbps of gaming, HD streaming and large file downloads.

MU-MIMO technology can provide two simultaneous data streams, improving the throughput and efficiency of the entire network when working with a compatible MU-MIMO router.

Highlights

High Gain Antenna for Broader Coverage

A high gain antenna reaches your router from farther with more precise directional range, sustaining faster and more stable wireless connections.

Rotate and adjust the antenna in the multi-direction to improve using experience in different environments.

Attention: This device may only be used indoors in all EU member states and EFTA countries.

[†]Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and will vary as a result of network conditions, AP limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and AP location.

[‡]Use of MU-MIMO requires AP to also support MU-MIMO.

[®]To ensure compatibility, you may need to update the adapter's drivers after an OS update. You can find our latest drivers in the download center at tp-link.com/en/download-center.
