Description

Aruba AirWave is an easy-to-use network operations system, that manages wired and wireless infrastructure from Aruba and a wide range of third-party manufacturers. It also combines visibility and controls, that let you optimize, how devices and apps perform on your network. Through a centralized and intuitive user interface, AirWave provides real-time monitoring, proactive alerts, historical reporting, and fast, efficient troubleshooting. Dedicated dashboard views quickly help view potential RF coverage issues, unified communications and collaboration (UCC) traffic, application performance and network services health.
