

Goldtouch Ergonomic Mouse

Ergonomic: neutral wrist position

Buttons: 2 large buttons and a separate scroll wheel (third button)

Left-handed version: the Goldtouch Ergonomic Mouse is also available in a left-handed version (BNEGTEML)

Slope: the mouse has a sloped surface of 24 degrees

Specifications

Dimensions:	80 x 50 x 115 mm (W x H x D)
Weight:	142 g
Product code:	BNEGTEMR (Righthanded) BNEGTEML (Left-handed)

Research

Unnatural postures are a risk factor for development of complaints of wrist and forearm (Karlqvist 1994, Jensen 1998, Hagberg 1994). When the mouse is positioned closer to the body the strain of shoulders and neck decreases (Armstrong 1995, Cook 1998). Productivity is lower when using a trackball and touchpad, standard mice and pen tablets enable a higher productivity.

Health & Safety Regulations

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Research has shown that the use of a vertical joystick mouse ensures a faster recovery from forearm, wrist and hand complaints (Aarås, et al., 2001).
