Description

Whether you're watching movies, playing games, or getting some work done, you'll get amazing visuals with Full HD resolution. See what's on the screen clearly at up to 178° whether viewed from an angle or front and center. Viewing from an angle is made possible via the IPS (In-plane Switching) panel and technology while maintaining the same level of high-quality color.

When you decide to unwind and relax, do so in front of a display with images that realistic and natural - with HDR. Acer's HDR Ready displays utilize an edge array with global dimming which increase the overall contrast, making black areas darker and white areas bright.

Say goodbye to stuttering and tearing with AMD Radeon FreeSync. Video playback is quicker, easier and smoother as the monitor's refresh rate is synched to your computer's framerate.

Enjoy clear, blur-free images even when the action speeds up with the 1ms Visual Response Boost. A rapid response time ensures images appear clearly as they quickly move across the display, providing more immersive viewing.
