multi-touch - wired - Ethernet

Group	PBX Accessories
Manufacturer	Poly
Manufacturer item no.	8200-84190-001
EAN/UPC	0610807857402

Description

Polycom RealPresence Touch is a touch interface for RealPresence Group Series and Polycom's Immersive Telepresence solutions. The simple and intuitive design lets you focus on your conversations instead of the technology. The design is consistent across the Polycom portfolio, whether you're calling from a conference room or using a Polycom desktop, mobile or web client. This makes it easy to use video collaboration from any environment, with an interface that is instantly familiar no matter where you're calling from.

For IT administrators, RealPresence Touch is easy to deploy, with Power over Ethernet for single cable connections. You can also adjust the experience to meet the unique needs of your users. The background image can be customized to match your branding or provide information about the room. Plus the home screen buttons and default screens can be selected by administrators to optimize the experience for their user base, resulting in fewer support calls.

Main features
