Description

Crystal clear and blemish free. That's not too much to ask for your phone's touchscreen, right? Amplify, engineered by Corning, delivers exactly that - a clear screen and pristine window into your world. The phone's important, but what matters most is everything inside it - pictures of cherished loved ones, videos of first steps and contact info for everyone you know. Do you even remember a phone number anymore? Amplify is engineered with long-lasting strength and up to 5x greater scratch resistance than the leading glass alternative to keep the view of all your important things perfectly clear.
