## Description

NVIDIA Quadro Data Center Workstation (Quadro vDWS) extends the benefits of NVIDIA Quadro GPUs to deliver superior performance from the data center, that maximizes workforce productivity, security, and IT manageability. NVIDIA Quadro Virtual Data Center Workstation extends the trusted benefits of Quadro to deliver a true graphics-accelerated data center. This lets IT virtualize any application from the data center with a workstation-class user experience. Now, your business can eliminate constrained workflows, that inhibit agility, and securely collaborate in real-time without borders or limits. You can efficiently centralize all of your apps and data, for dramatically lower IT OPEX. And IT can focus on managing the user instead of managing PCs and workstations, while enabling more secure work-from-anywhere workstyles with reduced threat of data loss or leakage.
